

Inhaltsverzeichnis

Keynotes

- 0.1 Trends in the Sector of Small- and Servodrives 9**
K.-H. Dempewolf, G. Konstas, I. Gröning, Wittenstein cyber motor GmbH, Igersheim
- 0.2 Semiconductor Solution Trends for Embedded Control of Small Drives 17**
A. de Rosa, R. Laschewski, TDK-Micronas GmbH, Freiburg

Session 1: Design and Simulation of Drive Components and Systems I

Session Chair: W. Amrhein, Johannes Kepler Universität Linz

- 1.1 Design of Highly Efficient Electrical Excited Silent-pole Synchronous Machine Utilizing Optimization Algorithm 24**
S. Udemä, C. Fräger, Hochschule Hannover
- 1.2 Investigation of a High-speed Drive for Turbo-machines 30**
T. Heidrich, F. Ludwig, A. Möckel, Technische Universität Ilmenau
- 1.3 Flux Focusing Effect within the Segmented Stator of an Axial Flux Machine 35**
J. Jung, IAV GmbH, Chemnitz-Stollberg; W. Hofmann, Technische Universität Dresden
- 1.4 Power Analysis of Embedded Multi-Core Systems for the Sensorless Operation of Multiple Electrical Drives 41**
E. Wagner, M. Lehser, Hochschule für Technik und Wirtschaft des Saarlandes;
M. Nienhaus, Universität des Saarlandes, Saarbrücken

Session 2: Design and Simulation of Drive Components and Systems II

Session Chair: A. Möckel, Technische Universität Ilmenau

- 2.1 Linux PC Based Speed Control via Ethernet Using an AURIX Microcontroller Board..... 47**
M. Becker, M. Nienhaus Universität des Saarlandes, Saarbrücken
- 2.2 Approximation of Inductance Changes due to Saturation of Permanent Magnet Synchronous Machines to Increase the Accuracy of Observer Methods of Sensorless Control 51**
N. Wilcken, C. Fräger, M. Grotjahn, Hochschule Hannover
- 2.3 Reduction of Torque Ripple in Induction Motors by Using a Modulated Rotor 57**
A. Pfannenstiel, Ziehl-Abegg SE, Künzelsau; A. Möckel, Technische Universität Ilmenau
- 2.4 Impact of the Embedding of Magnets on a Sensorless Drive Method 63**
S. Kleen, M. Nienhaus, Universität des Saarlandes, Saarbrücken

Session 3: Testing, Quality Assurance, Reliability I

Session Chair: J. Halfmann, Robert Bosch GmbH, Bühl

- 3.1 Mechanical Shocks Caused by Brakes on Electric Motors 68**
F. Rieger, B. Hagemann, SEW-Eurodrive GmbH & Co. KG, Bruchsal
- 3.2 Estimation of Motor Winding Inductances Based on Sensorless Technique for the Observation of the Rotor Position 74**
R. Schwartz, E. Grasso, M. Nienhaus, Universität des Saarlandes, Saarbrücken
- 3.3 Analysis of the Influence of Static and Dynamic Eccentricity on Back EMF of a Permanent Magnet Synchronous Motor 80**
M. Fischer, J. Roth-Stielow, Universität Stuttgart

Session 4: Testing, Quality Assurance, Reliability II

Session Chair: B. Hagemann, SEW-Eurodrive GmbH & Co. KG, Bruchsal

- 4.1 Automated Parameter Identification of Fractional Horse Power Permanent Magnet Synchronous Motors..... 86**
M. Hoerner, S. Wendel, A. Dietz, Technische Hochschule Nürnberg
- 4.2 Robust Electrical and Mechanical Parameter Identification of Low-Power PMSMs 92**
N. König, E. Grasso, M. Nienhaus, Universität des Saarlandes, Saarbrücken

Session 5: Direct Drive Systems, Integrated Mechatronic Drive Systems

Session Chair: G. Konstas, Wittenstein Cyber Motor GmbH, Igersheim

- 5.1 Magnetically Levitated Linear Drive with Passive Stabilized Axes Using Repulsive Magnetic Guidance..... 98**
M. Raab, W. Schinköthe, M. Schönwiesner, P. Neureuther, Universität Stuttgart
- 5.2 FEM Analysis of a Vernier Motor and its Operating Behaviour due to Manufacturing Tolerances..... 104**
V. Grabs, Lenze SE, Hameln
- 5.3 Redundant Brushless Drive System..... 109**
S. Jadhav, Dr. Faulhaber Drive Systems GmbH, & Co. KG, Schönaich

Session 6: Open and Closed-Loop Control

Session Chair: S. Pollmeier, ESR Pollmeier GmbH, Ober-Ramstadt

- 6.1 Sensorless Observation of the Arm-side Trajectory for Iteratively Increasing the Path Accuracy 113**
P. Stückelmaier, M. Grotjahn, C. Fräger, Hochschule Hannover
- 6.2 Development Board for Control Circuit Implementations 120**
F. Jacobs, Dr. Fritz Faulhaber GmbH & Co. KG, Schönaich
- 6.3 Model Predictive Position Control for Permanent Magnet Synchronous Linear Motors..... 125**
S. Wendel, A. Dietz, Technische Hochschule Nürnberg; R. Kennel, Technische Universität München

Session 7: Piezoelectric and Unconventional Drive Systems

Session Chair: H. Janocha, Universität des Saarlandes

- 7.1 Rotary Planar Actuator Using Mechanical Anisotropy of Tilted Carbon Fiber Arrays..... 131**
D. B. Thiem, A. Carrasco, J. Cardoletti, L. Alff, H. F. Schlaak, Technische Universität Darmstadt
- 7.2 Dynamic Modelling of SmartFlex® SMA Wires 136**
N. Bobic, P. Betz, A. Kazi, Hochschule Aalen; M. Köpfer, Actuator Solutions GmbH,
Gunzenhausen
- 7.3 Universal Coupled-Circuit Modelling Approach Applied to the Brushless Doubly-Fed
Induction Machine 142**
P. Löhdefink, A. Dietz, Technische Hochschule Nürnberg; A. Möckel, Technische Universität
Ilmenau

Session 8: New Materials and Sensors

Session Chair: G. Huth, Technische Universität Kaiserslautern

- 8.1 Alternative Materials for PM Synchronous Motors 148**
G. Huth, B. Löhlein, Technische Universität Kaiserslautern
- 8.2 Angle- and Length Measurement with Sensors Based on the Tunnel-Magneto-resistive
(TMR) Effect 154**
R. Slatter, Sensitec GmbH, Lahnau
- 8.3 Integrated Miniature Torque Sensing Device for Gearboxes 160**
F. Schwenker, Dr. Fritz Faulhaber GmbH & Co. KG, Schönaich
